EXTENSION SYSTEMS AND AGRICULTURE RESEARCH PROGRAMS NARRATIVE - FY 2027 BUDGET REQUEST

K-STATE RESEARCH & EXTENSION MISSION:

“We are dedicated to a safe, sustainable, competitive food and fiber system and to strong, healthy communities, families and youth through integrated research, analysis and education.”

K-STATE RESEARCH & EXTENSION VISION:

K-State Research and Extension is committed to expanding human capacity by delivering educational programs and technical information that result in improved leadership skills in communication, group dynamics, conflict resolution, issue analysis, and strategic planning. These efforts aim to enhance the economic viability and quality of life in communities.

PROGRAMS ESTABLISHED TO ASSIST WITH RESEARCH & EXTENSION’S MISSION

STATUTORY HISTORY

Kansas State University was established in 1863 under K.S.A. 76-401 to 76-446. The Kansas Legislature was the first in the nation to authorize the establishment of a land-grant college under the provisions of the Morrill Act of 1862. The college was established to provide educational opportunities at the college level to all who might benefit from it. This concept has guided Kansas State University since then. Kansas State University was also the first college in the nation to establish an agricultural experiment station authorized by the Hatch Act of Congress in 1887. Subsequently, in 1914, the University was the first to come under the Smith-Lever Act to expand the services of extension projects in various counties. In 1875, most of the University’s operations moved to the present site.

The First Morrill Act of July 2, 1862, provided for the donation of public lands to the several states and territories to establish colleges benefiting agriculture and mechanical arts. The 90,000 acres granted to the State of Kansas were to be used solely for Kansas State University. The interest arising from the sale of land was used as the Board of Regents determined for the maintenance, support, and development of Kansas State University. The principal is invested according to law and shall constitute a fund to remain forever undiminished. This fund is governed by the provisions of K.S.A. 76-408 and K.S.A. 76-410. Revenue from the interest on the State Agricultural University Fund is estimated at \$100,000 each year for FY 2026 and FY 2027. This is a Main Campus fund and is considered part of the “general use” base.

Extension Systems and Agriculture Research Programs

CHRONOLOGY HISTORY OF K-STATE RESEARCH & EXTENSION:

- 1862 The Morrill Act was passed paving the way for a land-grant university in every state.
- 1863 Bluemont College was renamed the Kansas State Agricultural College.
- 1887 The Kansas Agricultural Experiment Station was created at Kansas State Agricultural College under the provision of the Hatch Act.
- 1914 The Smith–Lever Act created the Cooperative Extension Service.
- 1959 The official university name was changed to Kansas State University of Agriculture and Applied Science.
- 1993 Separate subagency (Extension Systems and Agriculture Research Programs) created for budget purposes.
- 1996 The Kansas Agricultural Experiment Station and Kansas Cooperative Extension Service merged to form the Kansas State University Agricultural Experiment Station and Cooperative Extension Service (K-State Research and Extension).

DESCRIPTION OF PROGRAMS:

The Kansas Agricultural Experiment Station (AES) and the Cooperative Extension Service (CES) are mandated programs by both federal and state legislation. The AES and CES function as part of the agricultural research and cooperative extension system of this country. Involved in the system are the 1862 and 1890 land-grant colleges and 1994 Indian National universities, such as Kansas State University, and the United States Department of Agriculture (USDA). The provision of base (formula) funds by USDA mandates that ESARP report research and extension programs to USDA. The AES is to generate research-based information that will help Kansas farmers, families, and communities solve problems, enhance economic stability, conserve soil, water, and natural resources, and protect environmental quality. These programs are funded by federal formula funds and state funds.

K-State Research and Extension programming broadly spans crops; livestock; natural resources and the environment; food; economics, markets, and policy; human nutrition and health; and families, youth, and community well-being. KSRE employs faculty specialists and program leaders, county and area specialists, and support staff throughout the state and on the main campus in Manhattan. On the main campus, KSRE exists in multiple academic departments in the Colleges of Agriculture, Arts and Sciences, Veterinary Medicine, Engineering, and Health and Human Sciences. K-State Research and Extension's statewide coverage ensures region-specific programming across Kansas' population densities, variable environments, and growing conditions.

AES scientists have developed wheat varieties, livestock nutrition programs, grain sorghum and soybean germplasm, conservation tillage practices, disease and insect resistance in plants, control measures for animal diseases, and value-added products that have contributed millions of dollars annually to the Kansas economy and the economic well-being of Kansas agriculture. The application of the research information is a function of the educational programs of CES.

Narrative Information—DA 400

Division of the Budget
State of Kansas

Agency: Kansas State University -
Extension Systems and Agriculture Research Programs

CES is a research-based educational system with extension agents in each county in Kansas, with specialists in four area offices and three colleges on campus. CES provides research-based information related to agriculture, family and consumer sciences, 4-H and youth, community development, economic initiatives, and energy. Specialists are housed in the colleges of Agriculture, Health and Human Sciences, and Engineering.

Besides annual program development plans, five-year plans of work are submitted to USDA as part of an ongoing planning effort by the CES. This provides the short-and long-term planning required to address current and emerging educational issues for counties, districts, and the entire state.

CES offers many educational programs designed to strengthen the ability of agricultural producers and agribusiness, youth, families, and communities to improve their capability to make decisions. The application of the latest research information from the land-grant universities, USDA, private industry, and others provides significant contributions to the competitiveness, profitability, and quality of life in Kansas. Rural revitalization in Kansas is closely tied to the economic health of agriculture. Educational programs in support of economic development have helped communities develop leadership, set goals, and be successful in developing new businesses or assisting existing businesses to grow.

In International Programs, several hundred international participants visit Kansas State University each year and spend from one day to several weeks in short courses that enhance their capability to participate in the purchase and utilization of Kansas products. These programs are strengthened by their close association with research, teaching, and Extension-based faculty, who can inform international participants on the latest in technology and product quality.

Federal funds are provided by Congressional appropriations to USDA to support research in KAES and extension programs in CES. The Hatch Act and Smith-Lever Act and subsequent legislation (including the 1990 Food Security Act) established the purpose of the cooperative effort (partnership) between USDA (Federal) and Land-Grant University (state). The funds are provided to each state on a formula basis. Funds may be spent on salary, benefits, equipment, and operation but not permanent facilities. Annual reports must be made to justify fund expenditures. The federal funds also provide the concept of a network of land-grant universities to cooperatively support research and extension.

OTHER PERTINENT INFORMATION:

In FY 1993, the Agricultural Experiment Station, the Cooperative Extension Service, the International Grains Program, and the International Meat and Livestock programs were transferred to a newly established separate subagency for the purpose of preparing the Governor's budget report and related legislative measures for submission to the Legislature. The name of the subagency is Extension Systems and Agriculture Research Programs (ESARP). All programs previously part of the Kansas State University Main Campus budget (i.e., before FY 1993) but under the

Narrative Information—DA 400

Division of the Budget
State of Kansas

Agency: Kansas State University -
Extension Systems and Agriculture Research Programs

jurisdiction of the Dean of Agriculture, except the College of Agriculture, the Office of Academic Programs, and the Office of the Dean, are included in the subagency. The subagency is jointly administered by the Dean of Agriculture, who also serves as Director of the Agriculture Experiment Station, and the Executive Vice President for External Engagement and Chief of Staff. The Dean reports to the President of Kansas State University through the Provost, while the Executive Vice President reports directly to the President. The new subagency was authorized in Chapter 271 of the 1991 Session Laws of Kansas. The effective date for the implementation of ESARP was July 1, 1992. ESARP is now commonly referred to as K-State Research & Extension because of an organizational realignment occurring in 1996. In FY2025, the university announced that it is strengthening its statewide impact through the Elevating Extension initiative, which improves internal structure, communication, and engagement. By increasing connectivity, transparency, and alignment among extension professionals, we are better equipped to address Kansas' most pressing community needs.

STRATEGIC PLANNING

Overview

Kansas State University was created over 150 years ago as the nation's first operational land-grant university by passionate, pioneering, visionary educators. K-State was on the cutting edge when founded and will remain there in the future. K-State is guided by our strong heritage, inquisitive nature, and welcoming spirit.

Over the years, K-State's College of Agriculture and KSRE contributed historical "firsts" to advance crops; livestock; natural resources and the environment; food; economics, markets and policy; human nutrition and health; and families, youth and community well-being. The College and KSRE flexes to meet emerging needs of statewide stakeholders. The following are recent examples:

- Provided technical support and researched effectiveness of irrigation technology and water management practices on Water Technology Farms across the Ogallala-High Plains Aquifer
- Evaluated cotton crop varieties and production practices in limited irrigation and dryland growing conditions
- Identified Kansas cow/calf operations to participate in a multi-state, industry-driven initiative to pilot a national disease traceability system for the U.S. cattle industry
- Assisted local landowners with management decision-making as part of water right impairment agreements between Quivira National Wildlife Refuge and water users in the Rattlesnake Creek Basin.
- Assessing the healing effects of horticultural therapy on Post Traumatic Stress Disorder (PTSD) and Traumatic Brain Injuries (TBI) in partnership with the Servicemember Agricultural Vocation Education (SAVE) organization. In addition, assisted the SAVE organization with grant writing and management and strategic planning.

Narrative Information—DA 400

Division of the Budget
State of Kansas

Agency: Kansas State University -
Extension Systems and Agriculture Research

- Assisted beef and swine industries on critical issues triggered by the Covid-19 pandemic that caused a critical shortage of processing due to plant slowdowns and closures.
- Empowered Kansas farmers and agricultural professionals to test innovative, data-driven irrigation strategies in a competitive environment—without financial risk—through the Testing Ag Performance Solutions (TAPS) program. This unique program fosters collaboration and drives innovation by combining hands-on decision-making with cutting-edge research, resulting in smarter resource use for a more sustainable agricultural future.

Today, the prairie continues to challenge rural and urban Kansans with floods, droughts, blizzards, heat waves, and tornadoes. Remember the state motto – Ad astra per aspera – to the stars through difficulty. To deal with these challenges, we maintain strong research programs, including those that develop new varieties of wheat, soybeans, canola, and sorghum hybrids; improve livestock breeding and management practices; probe the basic biology underlying agricultural productivity; and develop new products, processes, and agricultural markets. We continue our strong extension programming to find new ways to translate, engage, and transform individuals, families, and communities towards becoming healthier and more resilient. We are building a unique public university of the prairie and the plains that is grounded in the past but is focused on the future’s cutting edge for Kansas, the nation, and the world.

Next-Gen K-State

In July 2022, K-State set out on an ambitious and comprehensive process to define the university’s future as a “next-generation land-grant university.” Thousands of interactions with the K-State community through surveys, interviews, focus groups and listening sessions yielded an array of thoughts, ideas and aspirations that have culminated into the Next-Gen K-State strategic plan officially launched September 2023.

The significant data and input that drove this process helped clarify our mission, define our vision and articulate the core values that we must live out and hold ourselves accountable to as we move forward. They serve as the foundation for building a culture of mutual accountability and they challenge us to operate as One K-State in all we do. In addition to these guideposts, seven theme areas with bold ideas, key priorities and success metrics were defined, as well as 10 strategic imperatives spanning across all theme areas.

Our Vision

Kansas State University will lead the nation as a next-generation land-grant university – setting the standard for inspiring learning, creativity, discovery and engagement that positively impacts society and transforms lives in Kansas and around the world.

Extension Systems and Agriculture Research

Values

- Connection
- Courage
- Impact
- Learner-focused
- People-centered
- Stewardship

Strategic Imperatives

Imperative 1 – We will grow our total enrollment to 30,000 learners across our campuses and formats by steadily increasing our traditional student population, significantly expanding our nontraditional and noncredit learners seeking microcredentials or certificates, growing our international markets, expanding our graduate student population both on campus and online and investing and growing each of our campuses in Manhattan, Salina and Olathe. The targets we have set for the learning populations that will drive this growth are intentionally framed as ranges to enable us to be nimble and responsive to real-time needs as demand shifts or grows with one or multiple learning populations.

We envision this learning population of 30,000 to include:

- 23,000 to 25,000 degree-seeking and credit-bearing undergraduate and graduate students studying at one of our three physical campuses or online
- 5,000 to 7,000 alternative credential-seeking learners – including those completing continuing education courses, earning microcredentials, completing training that lead toward industry credentials at their worksites and pursuing upskilling opportunities to learners seeking skills that can broaden and enhance their value in the workplace

Imperative 2 - We will improve our retention and graduation rates across all student populations, growing our first-year retention rate to 92%, our four-year graduation rate to 55% and our six-year graduation rate to 75% by implementing pathways and support structures that help all students progress through their K-State journey and earn their degree.

Imperative 3 - We will provide every degree-seeking student with applied learning experiences before they graduate, fulfilling our commitment to prepare students for life beyond K-State starting early in their college experience.

Imperative 4 - We will grow our research enterprise and annual research and discovery expenditures to \$300 million and our competitive research

Narrative Information—DA 400

Division of the Budget

Agency: Kansas State University -

State of Kansas

Extension Systems and Agriculture Research Programs

grants to \$270 million through large-scale interdisciplinary research focused on solving the world's grand challenges and developing the workforce to meet these targets.

Imperative 5 - We will nimbly and proactively meet the needs of learners, employers and society, working aggressively to understand and anticipate those needs and aligning our programs, services and structures to equip learners with the skills and experiences they need.

Imperative 6 - We will be known as a university that is open and aggressively pursues partnerships at all levels with a shared focus on making it easy and seamless for partners to work with K-State.

Imperative 7 - We will be a positive force for Kansans — generating significant economic impact for the state of Kansas, contributing to the economic prosperity of all 105 counties, building social mobility for Kansans, and solving problems in our state that can help create a brighter future for our region, nation, and world.

Imperative 8 - We will become One K-State in all we do, supported by a culture that binds and connects us — prioritizing a mindset of operational excellence at all levels to move our university forward.

Imperative 9 – We will become an employer of choice in Kansas and higher education that prioritizes a culture of well-being, satisfaction and engagement, competitive rewards, recognition of excellence, opportunity, continuous improvement and innovation.

Imperative 10 - We will grow our total fundraising and philanthropic giving to new heights – with a target of raising a total of \$2 billion from FY21-22 to FY29-30, further amplifying our ability to serve and support our learners, scale our impact and fulfill our mission.

The K-State Opportunity Agenda

Kansas State University has both an opportunity and imperative to bring our resources and expertise together in a way that both respects our unique structure and challenges historical norms. This starts with continuing to elevate disciplinary development and excellence and leveraging these single-discipline strengths toward interdisciplinary areas of focus that both build upon our strengths across the institution and lean into problems K-State is positioned to help solve on a grand scale. These core areas of opportunity are designed so that everyone across our institution can see themselves reflected in them in teaching, research, and Extension and engagement. They underpin and cut across all aspects of our strategic plan in how we will achieve our imperatives, accomplish our goals, and advance our priorities. They are also clearly defined in how they will work to magnify the university's collective impact — recognizing there are many perspectives and programs across each pillar of our land-grant mission to generate economic prosperity for Kansans and contribute to grand societal challenges in an interdisciplinary, mutually beneficial way.

Narrative Information—DA 400

Division of the Budget

Agency: Kansas State University -

State of Kansas

Extension Systems and Agriculture Research Programs

As a land-grant university that also maintains a Carnegie R1 research classification for doctoral universities with very high research activity and a Carnegie Foundation Community Engagement classification, we have a unique opportunity to further differentiate our teaching and research by integrating our K-State Research and Extension network deep within these areas of focus. Through Extension, we will leverage our statewide network to offer clear pathways and community-based partnerships both for experimentation and addressing real and pressing challenges across the state, honing best practices locally and regionally that can be scaled for global impact.

Community Health and Well-Being – Our underlying drivers are establishing community sense of place, improving the health and wellness of communities, building more resilient communities, improving health disparities and outcomes, enhancing education access and outcomes.

Sustainability - Our underlying drivers are working toward a more sustainable future in water, air, energy, soil, climate change, biodiversity and community resilience.

Global Food Security and Biosecurity - Our underlying drivers are enhancing and expanding food production, developing safe and sustainable agricultural practices and studying animal and plant infectious diseases to improve global health and security.

Enabling Technologies - Our underlying drivers are innovating technologies rooted in advanced manufacturing, artificial intelligence, internet of things (IoT), big data and data science, cybersecurity, aerospace technology, creativity and smart and connected communities.

PERFORMANCE MEASUREMENT:

Core Indicators of Quality Performance (as listed in the Governor's Budget Report Volume Two):

	FY 2025 <u>Actual</u>	FY 2026 <u>Estimated</u>	FY 2027 <u>Estimated</u>
Number of new research grants	600	600	606
Number of renewed research grants	263	263	265
Dollar value of grant receipts (in millions)	75.9M	\$75.9M	\$79.7M

Core indicators of quality performance for all subagencies may be found in the Main Campus budget request narrative.

KANSAS STATE UNIVERSITY

Section II-Budget Overview

Extension Systems and Agriculture Research Programs
September 2025

Narrative Information—DA 400

Division of the Budget

Agency: Kansas State University -

State of Kansas

Extension Systems and Agriculture Research Programs

OVERVIEW OF THE CURRENT YEAR BUDGET ESTIMATE (FY 2026):

The budget estimate for FY 2026 was prepared based on the funding adjustments approved by the Legislature and the Kansas Board of Regents (KBOR). University leadership proposed a 3.5% tuition rate increase for the 2025-2026 academic year that was approved by KBOR in June 2025. This rate adjustment is expected to generate approximately \$8,417,215 in additional revenue across all campuses.

The 2025 Legislature also certified funding for a 2.5% increase to employee compensation resulting in an additional \$3.8 million to fund compensation adjustments for positions funded by State General Fund dollars. Main Campus received \$2,259,302, K-State Salina received \$138,678, Veterinary Medicine received \$359,519, and ESARP received \$1,204,087.

OVERVIEW OF THE BUDGET YEAR REQUEST (FY 2027):

The FY 2027 budget request was prepared based on the instructions provided by the Kansas Board of Regents and the Division of Budget. The fringe benefits were recalculated utilizing estimated 2027 rates.

ESARP is in support of the Unified Appropriations Request submitted by KBOR.

TECHNICAL ISSUES:

FRINGE BENEFIT RATES:

The fringe benefits rates noted in Table B were used to calculate fringe benefits for ESARP.

REAPPROPRIATED BALANCES IN THE STATE GENERAL FUND:

N/A

Listed below are the special revenue funds that are designated for the ESARP subagency:

<u>Fund Description</u>	<u>Fund Number</u>
Fertilizer Research Fund	2263
Agricultural – Land Use Value Fund	2364
Faculty of Distinction Matching Fund	2479

Agency: Kansas State University -
Extension Systems and Agriculture Research Programs

Restricted Fees Fund	2697
Sponsored Research Overhead Fund	2921

THIRD-PARTY CONTRACTS:

All of the agreements are reported in the Main Campus document.

PROGRAM INFORMATION:

Academic Support – PCS 1.0

The Academic Support program includes those activities carried out in direct support of one or more of the three primary functions (Instruction, Research, and Public Service). Activities classified in this program include: 1) activities relating to the preservation, maintenance and display of both the stock of knowledge and educational materials (for example, library services and museums); 2) activities that directly contribute to the way in which instruction is delivered or research is conducted (such as educational media services, academic computing support, ancillary support); 3) activities directly related to the administration of academic programs; and 4) activities related to the professional development of academic personnel.

ESARP funding has been distributed to the Kansas State University Library because of its support for the research, extension, and public service objectives of ESARP. The Libraries' staff is responsible for acquiring, maintaining, and providing access to collections of materials requisite to the University's program requirements. Librarians at Kansas State University are dedicated to organizing, promoting, and interpreting the collections for the University community and the citizens of Kansas. A 153,000 square foot addition was completed in April 1997. Besides adding needed space, the addition totally integrates the three existing buildings currently comprising Hale Library.

Hale Library is the central unit of the University Library system. It is supplemented by four specialized subject libraries: Weigel Library in Architecture and Design (Seaton Hall), Physics/Mathematics (Cardwell Hall), Veterinary Medical (Veterinary Medical Teaching Building) and the College of Technology and Aviation Library and Media Services in Salina. K-State Libraries provide access to physical and electronic collections that support the teaching and research mission of the university. Our collections are comprised of over 3 million volumes and include our Special Collections and university archives and digitized materials. Our budget also supports online access to over 200 databases and over 90,000 electronic journals.

Narrative Information—DA 400

Division of the Budget

State of Kansas

Agency: Kansas State University -

Extension Systems and Agriculture Research Programs

Research - PCS 2.0:

The Research program includes those activities intended to produce one or more research outcomes including the creation of knowledge, the organization of knowledge and the application of knowledge. It includes both those activities carried out with institutional funds and those carried out under the terms of agreements with agencies external to the institution. Research activities may be conducted by any number of organizational entities including research divisions, bureaus, institutes, and experimental stations. Instructional activities such as workshops, short courses, and training grants are not classified with the Research program but are included in either the Instruction or Public Service programs.

The Kansas Agricultural Experiment Station (AES) is included in the Research Program. AES is funded by both Federal and State funds. AES conducts basic research to enhance the capability of agriculture to provide adequate food and fiber and improve rural living and human nutrition for present and future generations.

Research is performed both on and off-campus on state-owned and leased land. Twenty-three academic departments in five colleges are involved with AES. Off-Campus research is centered at three research-extension centers, four agricultural research centers, and ten experimental fields in various parts of the state. Included within AES are the Agricultural Research Center - Hays, the Northwest Research-Extension Center - Colby, the Southwest Research-Extension Center – Garden City, and the Southeast Agricultural Research Center - Parsons.

Public Service - PCS 3.0

The Public Service Program includes those program elements established to make available to the public the various unique resources and capabilities of the institution for the specific purpose of responding to community needs or solving community problems. This program includes the provision of institutional facilities as well as those services of the faculty and staff that are made available outside the context of the institution's regular instruction and research programs.

Cooperative Extension Service, International Meats and Livestock Program and International Grains Programs are included in the Public Service program in Extension Systems and Agriculture Research Programs.

The basic mission of the Cooperative Extension Service is to deliver informal, out-of-school, non-credit educational programs that help people solve problems. These programs are based on up-to-date research and practical applications of knowledge conducted by this and other institutions. CES provides an important learning bridge between the University and the people of the State. It takes scientific knowledge, principles, and practices that bear directly on the grass-roots problems of Kansans. At the same time, this unique delivery system brings back requests for new knowledge to the research staff at the university.

Narrative Information—DA 400

Division of the Budget

Agency: Kansas State University -

State of Kansas

Extension Systems and Agriculture Research Programs

The International Meat and Livestock Program have participants visit each year and spend from one day to several weeks in short courses that enhance their capability to participate in the purchase and utilization of Kansas products. This program is strengthened with its close affiliation with research, teaching and extension-based faculty who can inform international participants on the latest in technology and project quality.

The International Grains Program promotes the marketing of wheat, corn, soybeans, sorghum, and other U.S. grains. As a part of the effort to expand existing markets and to develop new ones for those agricultural commodities, program participants are trained in the processing and handling of U.S. food and feed grains, instructed in the use of the end products and given a thorough understanding of the workings of the U.S. grain marketing system.

Beginning in FY 1996, International Grains Program (IGP) and International Meat and Livestock Program (IMLP) appropriations were consolidated into the Agricultural Experiment Station appropriation. However, a PCS mismatch exists in that IGP and IMLP are public service functions (PCS 3.0) while AES is a research function (PCS 2.0).

Physical Plant Operations - PCS 4.0

The Physical Plant Operations program consists of those activities related to maintaining the existing grounds, building maintenance, custodial services and providing utility services. Plant Operations are fundamentally concerned with providing the services required to maintain, operate, plan, and create an environment conducive to learning and research. The major components of ESARP physical plant are utility services and building maintenance.

ESARP CAPITAL IMPROVEMENT INFORMATION

The purpose of this narrative section is to briefly describe the ESARP capital improvement projects for FY 2026 through FY 2027. Detailed information about each project can be found in the “Kansas State University Five-Year Capital Improvement Request, Fiscal Years 2026-2030 document that was submitted to the Division of Budget in July 2025.

Project Title: The Ag Innovation Initiative

Project Description and Justification: The Ag Innovation Initiative at Kansas State University is a transformative \$208 million project launched in 2022 to bolster the university’s standing as a global leader in food and agriculture research, teaching, and engagement. This initiative aims to develop innovative solutions and strategies to enhance the Kansas livestock and animal industry, a critical economic driver in the state. A significant component of this initiative is a \$25 million state investment, which will be matched 1:1, focusing on strengthening this vital sector. With \$142 million already raised from public and private sources, the initiative is on track to open its first phases in 2025. The state capital investment will also help secure the remaining \$41 million needed from private and federal sources.

Explanation of Receipt Estimates - DA 405

Division of the Budget

State of Kansas

Agency **Kansas State University**
Extension Systems and Agriculture Research Programs

2263 Fertilizer Research Fund

Statutory History: KSA 2-1221 creates a fertilizer research fund. All moneys credited to the fund shall be expended to the agricultural experiment station under the supervision of Kansas state university for the purpose of conducting research on fertilizers, anhydrous ammonia and related materials concerning efficient methods of application, storage and handling, their effect upon environmental quality, and efficiency and safety in the use of fertilizers, anhydrous ammonia and related materials in crop production.

A fertilizer “check off” fee is assessed on fertilizer purchases. Proceeds of the fee are transmitted to the Kansas Department of Agriculture and a percentage is forwarded to Kansas State University, approximately \$83,000 per year, for fertilizer research. The Director of the Kansas Agriculture Experiment Station awards fund to successful projects faculty have submitted.

June 30, 2025 Unencumbered Balance - \$370,944 Unused balance is assigned to existing projects to be completed during the completion of growing season and harvest this fall.

2479 Faculty of Distinction Matching Fund - ESARP

Statutory History: KSA 76-774 and 775 established the Kansas Partnership for Faculty of Distinction Program that is administered by the Kansas Board of Regents. The program was established to encourage major gifts by private donors to enhance the ability of eligible educational institutions to attract and retain faculty of distinction. The revenue generated is determined by the director of accounts and reports and shall be the amount of interest earnings that the amount of the qualifying gift, certified by the state board of regents, would have earned at the average net earnings rate of the pooled money investment board portfolio for the period for which the determination is being made. KSU ESARP currently has 2 qualifying endowed gifts for which earnings equivalents are received from the state.

June 30, 2025 Unencumbered Balance - \$131,792 The unspent balance are savings generated from unfilled positions and to level the effect of varied earnings return on salaries.

2697 Restricted Fees Fund

Statutory History: KSA 76-719 allows for funds received for any student-activity fee or for any other fees or charges fixed by the state board of regents shall be deposited in the state treasury and credited to the appropriate account of the restricted fees fund of the state educational institution or to another appropriate special revenue fund of the state educational institution. The appropriation bill provides that restricted fees shall be limited to receipts for the following accounts:

Agency **Kansas State University**
Extension Systems and Agriculture Research Programs

Plant pathology; Kansas artificial breeding service unit; technology equipment; professorships; agricultural experiment station, director's office; agronomy—Ashland farm; KSU agricultural research center—Hays; KSU southeast agricultural research center; KSU southwest research extension center; agronomy—general; agronomy—experimental field crop sales; entomology sales; grain science and industry—Kansas state university; food and nutrition research; extension services and publication; sponsored construction or improvement projects; gifts; comparative medicine; sales and services of educational programs; animal sciences and industry livestock and product sales; horticulture greenhouse and farm products sales; Konza prairie operations; departmental receipts for all sales, refunds and other collections; institutional support fee; KSU northwest research extension center operations; sponsored research, public service, equipment and facility grants; statistical laboratory; equipment/pesticide storage building; miscellaneous renovation—construction; other specifically designated receipts not available for general operations of the university: *Provided, however,* That the state board of regents, with the approval of the state finance council acting on this matter which is hereby characterized as a matter of legislative delegation and subject to the guidelines prescribed in subsection (c) of K.S.A. 75-3711c, and amendments thereto, may amend or change this list of restricted fees: *Provided further,* That all restricted fees shall be deposited in the state treasury in accordance with the provisions of K.S.A. 75-4215, and amendments thereto, and shall be credited to the appropriate account of the restricted fees fund and shall be used solely for the specific purpose or purposes for which collected: *And provided further,* That expenditures may be made from the Kansas agricultural mediation service account of the restricted fees fund: *And provided further,* That expenditures may be made from this fund for official hospitality.

June 30, 2025 Unencumbered Balance - \$23,981,247 These balances are owned by multiple campus units involved with research and extension projects that are capital and risk intensive (farms) and being accumulated for capital/equipment needs. These funds support salaries and benefits for support staff, research assistants and undergraduate and graduate students, as well as equipment purchases, farm equipment, and research activity.

2921 Sponsored Research Overhead

Statutory History: KSA 76-753 establishes in the state treasury a sponsored research overhead fund for each state educational institution. Revenues deposited into these funds are based on the Facilities and Administrative Cost (F&A rate) agreement that K-State negotiates with the federal government. The current rate of 52% is applied to some, not all, of the externally sponsored programs and returned to the University to fund overhead and administrative costs incurred by the university. The F&A rate is an approximation of the costs that an institution incurs to support its major programs.

June 30, 2025 Unencumbered Balance - \$13,079,898 These balances are owned by departments to leverage additional research projects and fund start-up commitments, replace outdated laboratory and research equipment and fund salaries and benefits for support staff, research assistants, and undergraduate and graduate students.

3144 University Federal Fund

Statutory History: SB 6 section 60 during the 2003 legislative session separated the federal funds on deposit in the restricted fee fund and moved it to the newly created university federal fund. Since FY 2004 all federal funds received from sponsored project awards and for student financial aid are deposited in this fund. Beginning in FY 2017, the University collapsed funds 3044-Federal Extension and 3046-Federal Experiment Station into Fund 3144. This change provides greater flexibility for year-end cash management.

June 30, 2025 Unencumbered Balance – (\$16,831,868) This fund carries forward a negative balance because most of the projects are reimbursable from the sponsor and are awaiting to receive reimbursement.
